- ①USB port: (optional flash disk, WIFI or BT Dongle)
- 2 Power port: connect the power adapter.
- 3 Network port: connecting local area network or Internet.
- 4PC port: the network port connect to the computer.
- 5 Headset port: connect headset.
- 6 Handset port: connect IP Phone handset.

# **Browser Access**

Many parameters can be set via a web browser. NOTE: some settings can interrupt the phone function.

- 1. Find the phone's IP address. Press (v) key, or Menu > Status > IPv4 / IPv6.
- 2. Login: Input the IP address in the web browser. The PC and phone MUST be in the same IP address segment (The default username and password are both 'admin'.)
- 3. Configure: Navigate to the desired parameter, make changes.
- 4. Save the changes.

## Language setting

- 1. Press Menu key > Basic > Language.
- 2. Select the desired language and press OK soft key.

# Making a call

Pre-dialing (allows corrections and quicker outdialing)

Handset: enter the phone number then pick up the handset.

Handsfree: enter phone number then press • (1)

**Headset:** enter phone number then press

While entering the phone number use the Delete soft key to replace an incorrect digit

Note: you can also lift the handset, press the Headset key or press the speakerphone key before dialing however pre-dial sends the call faster since the action of pressing these keys after dialing causes the immediate sending of the number.

# Answering a call

- 1. Using the handset: pick up the handset.
- 2. Using a headset: press 1.
- 3. Using the speakerphone: press •(1))

# Putting a call on hold

## Exclusive Hold - held call for you only

- 1. Press Hold soft key, caller is put on hold.
- 2. To retrieve the call press Resume soft key
- Note: with more than one active call, select desired call with the navigator keys and use the corresponding soft key to hold or resume.

#### System Hold (shared) - any user can pick up

1. While on a call press an idle (green) Hold 1 or 2.

# 2. Any user presses that Hold key to retrieve that call.

1. System Hold keys are red when a call is held there. 2. System Hold keys become available (green)

immediately after any user retrieves a call from one of the System Hold keys.
